## PROJECT

---

### The Wild Oasis Website

*Description:* Developed a customer-facing website for The Wild Oasis, a boutique hotel. The site allows guests to explore cabins, make reservations, and manage their profiles, seamlessly syncing with the hotel's internal management system.

*Technologies Used:* Next.js, React Server Components, Supabase, NextAuth, Tailwind CSS, Context API.

*Achievements/Results:*

- Integrated real-time updates between the customer site and internal hotel management.
- Enabled guests to create profiles, view, update, and manage reservations.
- Developed a user-friendly booking system with a responsive, modern design.

## WORK EXPERIENCE

---

### Frontend Developer

*Peaksoft House, Bishkek, Kyrgyzstan*

*Apr 2023 - Dec 2023*

- Developed responsive web pages and admin panels using HTML, CSS, and JavaScript, including features like order tracking, user monitoring, and CRUD operations.
- Ensured code consistency by configuring ESLint and Prettier according to team conventions.
- Collaborated with UX/UI designers to implement design concepts into functional web applications.
- Managed version control with Git, tracking and documenting changes throughout development.
